Environmental Effects

There are no significant hazards expected with intended use.

Physical and Chemical Hazards

There are no significant hazards expected with intended use.

Specific Hazards

There are no significant hazards expected with intended use.

Main Symptoms

Acute Inhalation Toxicity

Under normal use conditions, there is no possibility to inhale the particle of ink.

Acute Oral Toxicity

Low acute toxicity in animal experiment.

Acute Eye Irritation

May cause slight transient irritation.

Acute Skin Irritation

May cause slight transient irritation.

Sensitization

From test no apparent significant hazards are expected.

Chronic Effect

Under normal use conditions, there is no possibility to inhale the particle of ink.

Carcinogenicity

Carbon black contained in this product is classified to Group 2B of IARC as the result of inhalation test in use of rat.

This is due to the fact that rat alone showed lung tumor in the animal experiment under very high concentration.

During a normal use of this product, design of the cartridge proves it impossible to have powder carbon black released to the air.

Intake from the mouth and skin does not show carcinogenicity.

The Classification of The Chemical Product

This preparation is not claassified as dangerous according to Directive 1999/45/EC
